Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5, 6 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,061,246 (hereafter Oh).

Oh discloses, referring to figures 3-5, an interconnection device comprising: first and second outer layers (121), each including substrate material; and at least one inner layer (122) including at least one conductive signal trace (141) disposed on substrate material proximate to an edge of the interconnection device and being accessible for direct electrical connection with a corresponding exposed signal trace (13) wherein at least one conductive protrusion (142) is formed on said conductive inner layer trace [claim 1], wherein said conductive inner trace layer trace extends outward from the edge of the interconnection device [claim 2], wherein at least a portion of said first outer layer is removed to provide access to said conductive inner layer trace [claim 3], wherein said

Art Unit: 2827

protrusion is malleable [claim 5], wherein said protrusion is resilient [claim 6], wherein said inner layer substrate material is organic (see col. 4, lines 40-45) [claim 13]

Claims 12 and 29-33 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,209,671 (hereafter Sugimoto).

Sugimoto discloses, referring to figure 1, an interconnection device comprising; first (12) and second (5) outer layers, each including substrate material; and at least one inner layer including at least one conductive signal trace (see col. 3, lines 5-15) disposed on substrate material proximate to an edge of the interconnection device and being accessible for direct electrical connection with a corresponding signal trace, wherein said inner layer substrate material is a ceramic (see col. 4, lines 15-25) [claim 12], wherein said conductive inner layer trace extends outward from the edge of the interconnection device [claim 29], wherein at least a portion of said first outer layer is removed to provide access to said conductive inner layer trace [claim 30], wherein at least one conductive protrusion (13) is formed on said conductive inner trace [claim 31], wherein said protrusion is malleable [claim 32], wherein said protrusion is resilient [claim 33].

Response to Arguments

Applicant's arguments with respect to claims 1-6, 12, 13, and 29-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
